

OPEN HOUSE

MARCH 8, 2018
TORONTO, ON

 **BIESSE**

Join us for our Panel Processing event! Thursday 9:00 am-5:30 pm

Biesse invites you to experience the latest industry trends at our **Panel Processing Open House** on March 8 at the Biesse Canada Toronto Showroom. The event schedule includes free educational seminars on progressive techniques in cabinet joinery and emerging trends in edgebanding!

Advanced Joinery Methods for Nested Based Manufacturing – Join us to learn progressive techniques in cabinet joinery. You will learn how to improve the efficiency of your CNC router by adopting joinery methods to improve the quality of your casework while reducing the cycle times of your nesting processes. We will demonstrate machining **blind dadoes, mortise and tenon joinery** and **hybrid construction methodologies**. Hybrid construction incorporates dowels and confirmat screws within the same joint, reducing CNC router cycle times and improving assembly ease and speed.

Understanding Emerging Trends in Edgebanding – The market has changed with the growing popularity of Textured and High Gloss Panel and the renewed interest in alternate gluing technologies. The push for the highest quality edge application is paramount. See the application and results with the **latest equipment and technology for EVA, PUR and Hot Air application**. Biesse America's in-house experts will demonstrate how to unleash greater productivity and quality with the latest CNC and Edgebanding technologies.

Be sure to register today as space is limited and these popular events fill up quickly!
