registration menu bar

Join us on Wednesday & Thursday, May 8th & 9th at Biesse's Mirabel facility to experience Biesse's extraordinary technology for manufacturing wood, plastics and composite materials. We will have multiple machines under power and ready for you to test solutions, exchange ideas and demonstrate how our technology can simplify your production process.

Our Spring Technology Days offers you an exciting insider's preview of our most innovative technologies, integrated solutions and exceptional services. Everywhere you look, game-changing machinery is ready to help shape your future.

Featured Machines

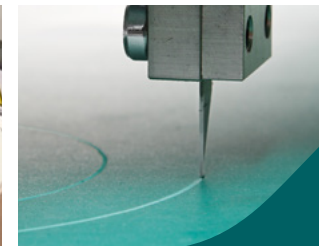

Biesse Wood
CNC machining
Rover B HD 1536

Drilling & milling
Elix K3
Sanding
Opera 5 XLL

Edgebanding
Stream A 6.5
